Explore the inner and outer secrets of: The Magical Dwelling with Feng Shui"

Unlock Nature's Secrets to Create Harmony, Health and Ecological Balance in the Home and Work Places.

A Blueprint for Creating the Natural Home and Workplace.

It has now become an integral part of Feng Shui Practitioners and Architects & Designers job to address the biological and ecological aspects of a healthy environment.

The goal of **The Magical Dwelling** - is to teach practices that create health, harmony and balance in our inner and outer world. This workshop is based in the Principles of Feng Shui and Ecology that form a key to understanding the dialogue between human beings and nature and a healthy work environment. The Five Elements of Ecology and Sustainable Design, The Four Strategies of Climate Design, Solar Design Orientation and Building Shapes, The Principles of Bau-Biologie and Healthy Buildings, Tools and Diagnosis for Healing Sick Building Syndrome, Electro Magnetic Stress Detection and Mitigation and Meters, Creating the Natural, Healthy Home and Workplace, Discovering Products for the Healthy Home and Lifestyle.

FENG SHUI: (pronounced "Fung Shway")

Ancient Chinese art of promoting health, happiness and prosperity by harnessing positive energy or "Ch'i" from our environment using the BaGua, the blueprint and design tool of FENG SHUI
